

## PRODUCT SHEET

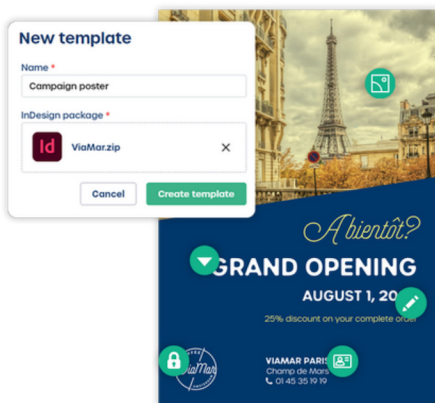

# Template Studio

From InDesign file to Dynamic Template in minutes

Marvia

Unlock your designs' full potential with Marvia's Template Studio. Effortlessly transform your InDesign files into dynamic, customizable templates in just a few simple steps. Your team or partners can then easily localize these templates using our visual editor.

## Benefits Template Studio

- ✓ Create no code, dynamic templates in the portal
- ✓ Design-to-content in minutes, not hours
- ✓ Advanced customization options like patterns and multi-select
- ✓ Set rules to ensure on-brand content, everywhere
- ✓ Integrates seamlessly into your design workflows
- ✓ Instant preview and review in real-time before finalizing

## How does it work?

### 1. Upload

Drag & drop your InDesign package into the Template Studio.

### 2. Auto-conversion tags

All your tags are converted into variables.

### 3. Define rules and constraints

Make the templates as open or fixed as you want

### 4. Generate & create

Generate and share your dynamic template and let users create with ease

## Unique Features

### DNA

Use DNA to auto-import data and images from users or locations.

### Images

Control user uploads, use specific DAM categories or help with a multi-select.

### Linear scaling

Make a template efficiently for both large and small formats.
